

National Atmospheric Deposition Program

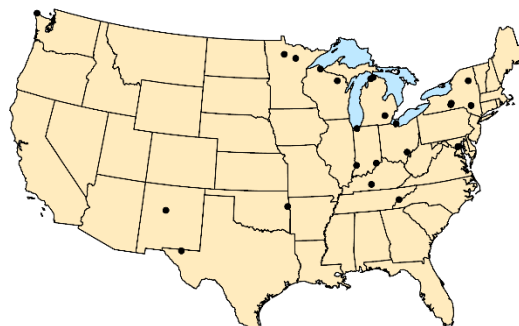

**2026 Calendar**

# Network Maps

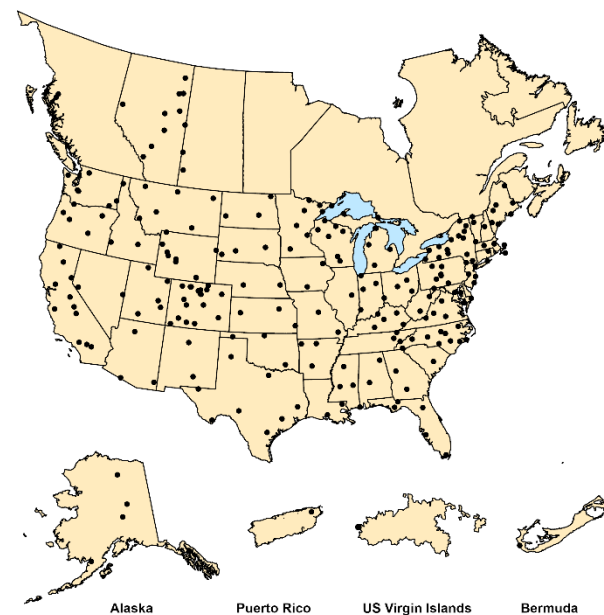

Mercury Deposition Network (MDN)

Mercury Litterfall Network (MLN)

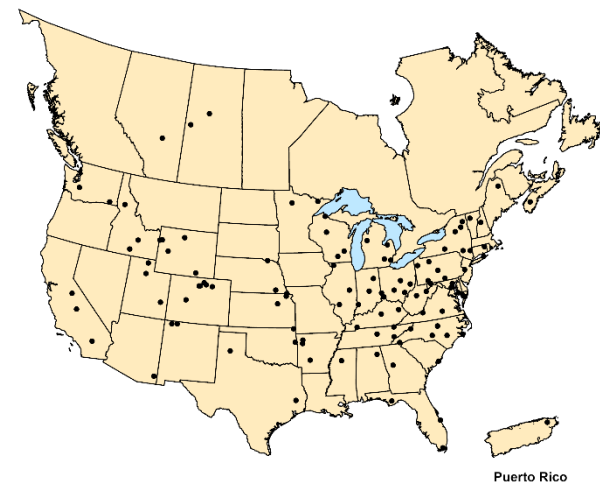

National Trends Network (NTN)

Atmospheric Mercury Network (AMNet)

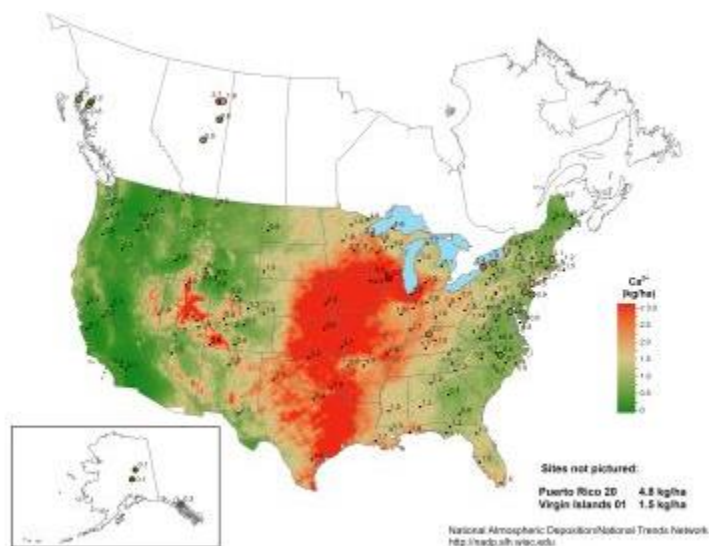

Ammonia Monitoring Network (AMoN)

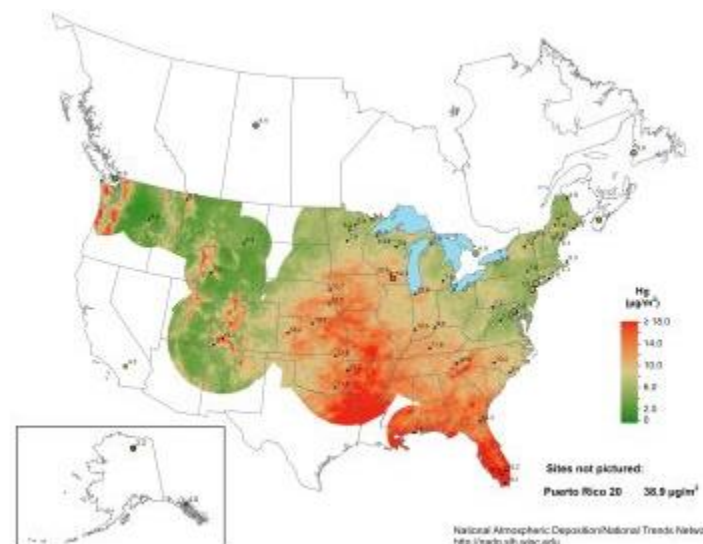

# NADP Summary

The National Atmospheric Deposition Program (NADP) is a National Research Support Program of the State Agricultural Experiment Stations (NRSP-3), housed at the Wisconsin State Laboratory of Hygiene at the University of Wisconsin-Madison, and is based on collaborative efforts between many different groups interested in atmospheric deposition of pollutants and their effects on different environments. It is structured as a cooperative program that represents coordinated efforts of many individuals in federal, state, tribal and local governmental agencies, educational institutions, private companies, and non-governmental agencies to operate monitoring sites and report data. The NADP provides free and easy access to all of its precipitation data, including seasonal and annual averages, trend plots, deposition maps, reports, manuals, and educational brochures. The annual map summary is the principal product of the NADP. It summarizes the results of network operation for the most recent complete calendar year in graphic form. Examples from the annual summary are shown below. Copies of the 2024 Annual Summary are available at <https://nadp.slh.wisc.edu/pubs/Annual-Data-Summaries/>.

2024 Calcium Deposition

2024 Total Mercury Wet Deposition

The NADP is located at the Wisconsin State Laboratory of Hygiene, a unit of the University of Wisconsin-Madison. For more information, contact: NADP Program Office, Wisconsin State Laboratory of Hygiene, 465 Henry Mall, Madison, Wisconsin 53706; E-mail: [nadp@slh.wisc.edu](mailto:nadp@slh.wisc.edu); or visit <http://nadp.slh.wisc.edu>

National Atmospheric Deposition Program

Annual Summaries

# Notes from the Chair

From site operators, collecting samples each week, to the Program Office and Laboratory staff who turn those individual samples into interpretable data, to the committee members who keep the program moving forward NADP is a tightly knit community dedicated to our mission and to each other.

As we head into a new year, we face the retirements and reassignments of many long-term committee members as well as the retirements of Jamie Schauer, Director of the Wisconsin State Laboratory of Hygiene, our long-time Coordinator David Gay, and of course our “Mr. Does-it-all” Site Liaison Richard Tanabe. These are huge losses to NADP, of institutional knowledge and of friends with whom we have worked for decades, and we will miss them sorely. I want to express gratitude from the entire NADP community to all of the people who are moving on to new chapters in their lives and have served NADP with such dedication and wisdom – we wish you well.

Meanwhile, we have work to do. We have spent the last year optimizing existing networks and developing a new PFAS network—efforts that will ensure NADP remains efficient, effective, and relevant as we adapt to changing environmental and programmatic conditions. NADP is entering its 48th year and together we remain committed to delivering high-quality atmospheric deposition data to researchers, policy makers and the public to protect human and ecosystem health.

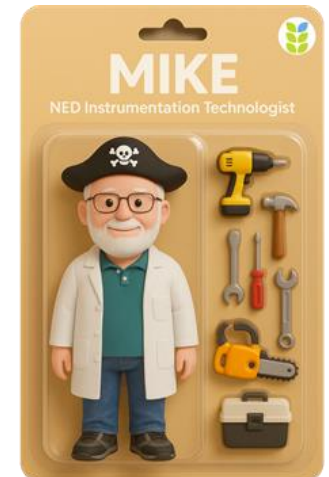

Mike McHale, USGS  
Incoming Chair of the Executive Committee
