

2026 NADP Spring Meeting and Scientific Symposium

Save the Date

Thinking Outside the Bucket: Innovation in a Changing Environment

June 9-12, 2026

Madison, Wisconsin

The Madison Concourse Hotel

June 9: Technical and Science Committee Meetings

June 10-11: Scientific Symposium

June 12: Field Trip - TBD

Reduced registration fees for students and virtual attendees. Call for abstracts will be announced in February 2026. The website will be updated as details become available.

About the Scientific Symposium

The theme of the 2026 National Atmospheric Deposition Program (NADP) Scientific Symposium, “**Thinking Outside the Bucket: Innovation in a Changing Environment**”, is intended to encourage innovative approaches to air, deposition, and ecosystem monitoring and data analyses. The symposium will bring together scientists, environmental policy professionals, natural resource managers, and advocacy groups to advance the science and tools that are needed to effectively protect human and ecosystem health.

NADP is a dynamic, long-term partnership of federal, state, tribal and local governmental agencies, educational institutions, private companies, and non-governmental organizations. NADP facilitates robust research on atmospheric monitoring and modeling to provide information on multipollutant source/receptor relationships, deposition effects on terrestrial and aquatic ecosystems, and biogeochemical cycling of elements.

Major topics to be discussed at the 2026 Scientific Symposium include:

- Linkages between Emissions and Ecosystem Response
- Mercury Cycling, Deposition, and Bioaccumulation
- Atmospheric Deposition Monitoring: Networks, Methods, and Innovative Data Analyses
- Aerosols, Particles, and Air–Surface Exchange
- Emerging Pollutants and their Impacts on Human Health
- State, Local and Tribal Concerns Connecting Air Quality to Atmospheric Deposition
